thanks Lora. [Ex. 6 - Personal Privacy] is a really sweet lady with some questions that I think really trouble her. I found out from Cabot that her water tested 16ppb for As in about Sept 2010. I do not know if that was at the tap or well head. [Ex. 6 - Personal Privacy] did have a defective RO system that is probably working now. She is about [Ex. 6 - Personal Privacy] and has tremors that both her parents also had. Her parents also drank the water here and of course would not have had the RO. Maybe As or some other contaminant had something to do with it?

We'll get you a full data package soon. Fetzer will be back Tuesday and will also likely be the OSC to go with you during the visit.

thanks again.
Rich
